

neurophet

Clinical imaging core lab

Advance your clinical trial
with a global neuro-imaging core lab

Advance your clinical trial with a global neuro-imaging core
Partnering with experts in brain imaging analysis

Neurophet's Approach to Imaging Core Lab Services

Study Design
Provides comprehensive scientific and medical assistance in the study design phase

Study Start Up
Delivers study-specific technical documents, performs site training and site qualification

Image Management
Fully integrated with data management systems for image submission, quality control and query resolution.

Neuro-image Analysis
Executes precise image processing and analysis with cutting-edge technologies that align with established protocols, covering all aspects of enrollment, efficacy, and safety.

Data Management
comprehensive biostatistical services that enhance and support data-driven clinical decision-making.

Area of Clinical Research

Area to Clinical Research	Modality	Target Biomarker	Neurophet's Solutions	Outcomes & Benefits
Neuro-degenerative	MRI	Structural atrophy (T1)	Neurophet AQUA	126 ROIs volumetric analysis and atrophy measurement based on normative database, WMH quantification based on Fazekas scale assessment.
		White Matter Hyperintensity (T2-FLAIR)		
		ARIA-E (Edema, Effusion)	Neurophet AQUA AD	ARIA-E, ARIA-H severity and longitudinal tracking, Brain volume tracking after amyloid target therapy, Amyloid positivity prediction
		ARIA-H (Hemorrhage)		
	PET	Amyloid	Neurophet SCALE PET	Enhanced PET tracer /SUVR measurements and Centiloid Scale for effective drug development.
		Tau		
		FDG		
CNS Demyelinating (MS, NMOSD, MOGAD)	MRI	T2 FLAIR	Neurophet AQUA	Track and visualize lesion changes to assess disease progression and drug efficacy. Use only FLAIR sequence for brain structure volume calculations, enhancing analysis
Cerebrovascular	MRI	Cerebral Microbleeds	Neurophet SCALE MRI	Accurate cerebral microbleed detection for comprehensive vascular assessment.
Developmental	MRI	T1/T2 Infant Volumetry	Neurophet AQUA Pediatrics	Brain image analysis and volume measurements for 0-24 months old(including preterm baby)

About Neurophet

Partner with Neurophet to leverage AI-driven neuroimaging expertise for breakthroughs in pharma and biotech research

30+

Neuro-imaging experts

6

In-house Medical Doctors

20+

Global partner

100+

Hospital use

Phase 3

Global core lab

AI-Powered analysis

Analyze large datasets of neuro-imaging with speed and precision, facilitating effective patient pre-identification.

Maximize efficiency

Streamlined work flows, time and cost savings, and accurate analysis of research outcomes with Neurophet empowers informed decisions and optimal results.

Accurate and reliable

Experience trustworthy neuro-imaging analysis with automated quantitative results that are accurate and reliable.

Customized service

Neurophet provides dedicated team for each study that is tailored to the individual needs of each user.
